Destruction of NIS

Attached is a list of NIS sections recommended for destruction. Of primary consideration is the damage to the NIS Program image of a long "tail" of sections on the shelves which essentially are not valid or, at least, are not so regarded by potential users.

It is also important to demonstrate to Agency people (DD/S) that we are mindful of the storage problem and periodically review the continuing validity of our extensive NIS stock.

The unlikelihood of maintenance on many of the sections listed and the existence of Chapter I or pending General Surveyson areas for which some destruction is indicated should be noted.

Not included in the list are those sections which will be superseded in FY64.
